

Village Shop

Again good sales with ytd profit above last year

Village hall

Again door lock issues, have updated the risk assessment for the hall with new signs as appropriate.

Patrick

New Shop

- We have obtained Building Control approval. This was a struggle dealing with HDC's outsourced building inspection team. The approval has some conditions which we are confident that we can deal with.
- Having been accepted for the Thalia grant, we have submitted the Full Application to CCF, and should hear back by early October.
- We are dealing with the final Cabin details, ensuring it is compliant with the Building Regulations placed upon us.
- We are asking the building works contractor to confirm their quote.
- We are due a quote from Steve Treadaway to cut the hedge back before the new shop goes in.

Village Hall

- The Hall door lock has a mechanical fault, making it difficult to open the door. A new lock has been promised two weeks ago by the manufacturer, Simplified, but they've started using Amazon delivery and there is a problem. In the meantime, lifting the door handle, then pressing pushing it down seems to work.
- We have fitted a nappy changing table in the disabled toilet.
